Introduction

Thank you for downloading our brand new 2024 fitted and free-standing catalogue.

We now have over 200 fitted cabinets, in addition we have a superb range of free-standing pieces that you can mix and match with the fitted items.

All of our cabinets are made from scratch especially for you in our own workshop, we do not sub contract.

Kitchens very rarely suit "standard" size units, and so ours are made to measure. This means that for most of our items, you can have any height, width and depth.

In addition, we can adjust our cabinets in lots of different ways to accommodate the problems often faced when trying to fit a kitchen. These include cut outs to enable a cabinet to fit around a pillar, for example. We can make a cabinet with one side deeper than the other to fit uneven walls. We can supply just the front frame and doors if you don't need a whole cabinet, to hide a boiler for example. Our base cabinets have a 50mm recess at the back for pipework, etc, and our wall cupboards have a 20mm recess for scribing the sides. However, you can specify any size recess you need on any cabinet.

Another unique part of our service is that you can choose the panel split for tall doors. For example, you can choose to have the panels on a tall door match wall cupboards, base cabinets, or you can choose a 50/50 or 60/40 split.

Our drawers are fitted with top quality Grass/Blum/Kingslide soft close runners with a massive 40kg weight limit. In addition all of our drawers are traditionally made with dovetail joints. Our doors are also traditionally made with mortise and tenon joints, and are 25mm thick. You can choose from 4 different door styles, 3 drawer styles and combine these with a choice of 4 cornice styles, 4 plinth styles and 3 hinge styles .

Because we make real cabinets, you rarely need to buy extra end panels as you do with so many other kitchens. Cabinets sides that are on show can be supplied plain, or V grooved (to give a T&G look). This degree of customisation means you can get a very individual look, and cabinets that fit your kitchen perfectly.

Thank you again for downloading this catalogue, and please call us on 01202 475515 if you have any questions.

Kind Regards,

Russ & Julie
Managing Directors
Handmade Kitchens of Christchurch Ltd

About Us

We started Handmade Kitchens of Christchurch in 2001, and the business has grown a little every year. As we grow we try to ensure that we focus on the things that we enjoyed when we started. That is, giving the best service we can, offering great quality and great value for money.

Our what our customers say and customer gallery web pages started all those years ago have built into a fantastic record of what we and our customers have achieved together. Both pages are still regularly updated, and they are a good place to start if you want to get a feel for the experience customers have had with us.

We are proud that so many of our customers are referred by previous customers, whether friends, family or work colleagues. We also have many customers that have bought 2, 3 or even 4 kitchens as they have moved house over the years.

Our showroom team are all very experienced but unlike most kitchen showroom people they are not on commission, so their sole aim is helping you get the kitchen you want, not selling you as many cabinets as possible. When you contact us, you'll usually deal with the same person each time you call, you'll get to know us, and we'll get to know you. We will go out of our way to help you get exactly what you want, and our advice is free.

We have our own workshop in the Midlands, which is ideally placed to deliver throughout the UK at the most economic cost. At the workshop we currently have a team of 30, and the vast majority are time served, fully qualified Bench Joiners or Cabinet Makers each with over 20 years experience of kitchen and furniture making.

All of your cabinets will be made especially for you from scratch in our workshop. We do not sub contract.

Your kitchen will be delivered ready to fit and paint. This is really important as in common with Smallbone, Mark Wilkinson and most other top end companies we recommend that painting is always carried out after fitting, as this will give you the best finish. Some companies paint before they deliver but you will almost certainly have trouble touching up the cabinets after fitting, and colour matching problems caused by different batches of the same colour.

We believe that what makes us unique is the way we combine the following:

- Attention to quality.
- A range of over 200 cabinets in any height, width or depth.
- Many bespoke options.
- Mix and match door styles, drawer styles, plinth and cornice.
- Low prices which mean you can get a national magazine quality handmade kitchen(see our magazine features page) for less than many Magnet kitchens during our sale.

We believe that no-one else offers such a complete and affordable package.

Our Workshop

The heart of any good bespoke kitchen company is the workshop, and its craftsmen. We currently have a team of 30 at our workshop, and the vast majority are time served, fully qualified Bench Joiners or Cabinet Makers each with over 20 years experience of kitchen and furniture making.

Our emphasis is always on quality, and this begins with recruiting the right people. It is worth noting that just as most of our customers are referred to us by existing customers, so most of our recruitment is as a result of referrals by existing team members who have previously worked with a prospective recruit and can vouch for the quality of their work, and the pride they take in producing quality products.

Having our own workshop enables us make sure that every cabinet meets our own top quality standards, every time. It also makes us flexible enough to offer an unbeatable range of options and customization, while keeping the kitchen affordable.

All your cabinets are built from scratch especially for you in our workshop. We do not sub contract.

We constantly review our processes, to ensure that we are always using the latest technology and combine it with the traditional techniques our craftsman have spent years perfecting. For example our cabinets are screwed and glued together, and our cabinet frames are also screwed and glued. This is just about the strongest construction technique available and means we can ensure that the cabinets will last for years.

Our doors are hung on solid brass (but with a choice of 3 finishes), top quality hinges which are rebated into the door. The quality of the hinges and the technique used means your doors will never drop or fall out of line.

Your kitchen will be made from scratch especially for you by a small team of 3 people, chosen to work together for their complementary skills. The team will include a dovetail drawer expert and a door making and fitting expert. The finished kitchen will then be closely checked by our Workshop Manager who, along with the team that made the kitchen are completely responsible for the accuracy and the quality of the kitchen.

All of this ensures that quality is something that is built in, and it is rare for our Workshop Manager to actually find an error when he completes his final check, but we are all human, and so just in case each check is conducted extremely thoroughly. This emphasis on quality goes from our first contact with you to the delivery of your kitchen by our own delivery guys in our own vans. We often receive great feedback from our customers about our deliveries, as you can see on our what our customers say page.

Bespoke Options

There are lots of things to consider when choosing a kitchen maker for your new kitchen. This page, and the following page set out how we are different and how the unique combination of features only we offer can make a huge difference to your new kitchen.

We offer the biggest range of cabinets in the UK. Currently over 200 fitted and freestanding cabinets, and each cabinet is made from scratch especially for you.

This means it is very likely that we will have just the right cabinet for any situation or space you have.

You can have 95% of those cabinets in any height, width or depth you need.

1. Any Height

This means you can proportion your cabinets to your ceiling height. Most kitchen brochures will show staged kitchens with just the right ceiling height. But if your ceiling height isn't the same, or varies, your kitchen won't look like the brochure.

If you take a look at our customer gallery on our website you will see photos of real kitchens sent in by customers. What they all have in common is that they were able to proportion the cabinet heights to the ceiling height, so they don't look too big and overpowering or too small and under sized.

Note in the pic below, the larder and wall cupboards are proportioned so that there is just the right amount of space between the cupboard tops and the ceiling. With standard heights, it's easy to leave too much space or too small a space.

If you are building an extension, chances are you will have an RSJ or beam running across the ceiling. With our cabinets we can get the right proportions and still maximise storage space. You can also have different heights in different areas of the room, and we can even make a feature out of what would be a problem for other kitchen companies.

Any Width

There are a few rules in kitchen design that have stood the test of time because they just work. One of these is that your tap looks best in the centre of a window. If you can have any cabinet at any width, a run of cabinets can be made to measure to achieve this. If you have standard or limited size cabinets it can't be done without the use of big fillers and lots of tray spaces. The same problem occurs when a run of cabinets meets a door or a window. With our cabinets you can stop the run at just the right space from the start of the door to allow a proper size worktop overlap before the door architrave starts, or to allow the return cornice to go down the side of the wall cupboard before the window starts.

Some customers like their kitchen to look symmetrical if possible, and because with our cabinets the widths of the whole run can often be adjusted, we can do it where others often can't. Note the symmetry either side of the sink, and the tap in the centre of the window.

Any Depth

If you have a pillar/soil pipe box we can make a reduced depth cabinet to sit in front of it so that it matches the rest of a run of cabinets. If you need the cabinet to fit around the pillar we can do that too building a cabinet so that it fits snugly around the pillar.

Note In the drawing below the base and wall cupboards end just the right distance from the kitchen door. Note also that the 2 door wall cupboard is deeper than the microwave housing to make a feature of the area.

2. Panelling

Not only can you have any height you need for a tall cabinet, with us you can decide the way the door panels are divided. This makes an enormous difference to the way your kitchen looks.

Please take a look at the pics below that show the difference panelling can make on what is otherwise the same run of cabinets.

Note:

The tall cabinet door panels match the base cabinet door panels

Note:

in this example the tall cabinet door panels match the wall cupboard door panels

So, you can choose from the following panelling options:

1. To match base door panels
2. To match wall cupboard door panels
3. To match larder top door panels
4. To match integrated fridge freezer doors
5. A 60/40 split, a 50/50 split or a 40/60 split.

3. Mantels & Extractor housings

Some companies will offer you just a mantel shelf, others may have a full mantel in 1 size.

We have 18 variations of mantel and extractor housings plus you can have any height, width or depth.

This means that you can make a real feature of the mantel, and get a look that is right for your kitchen and doesn't look like all your friend's kitchens.

4. Mix & Match

Most companies have "named" ranges like "Wentworth" that have pre determined door and drawer styles. With our kitchens you can mix and match everything. That includes door styles, drawer styles, cornice styles, plinth styles, and knobs and handles.

In fact you can mix and match:

- 4 door styles
- 3 drawer styles
- 4 cornice styles
- 4 plinth styles
- Any knobs and handles you like.

This means you can get exactly the look you are going for, whether it's traditional, classic or contemporary.

Customise Your Cabinets

Most kitchen makers make kitchens in standard sizes, and you have to adapt the units to your kitchen. This often means having wide filler pieces and “tray spaces” to make the kitchen fit.

However, not only do we make most of our cabinets in any size you need, so eliminating the expense of the fillers, end panels and tray spaces, we can also customise your cabinets to get around lots of the most common problems that arise when fitting a new kitchen.

Cut Outs

We can build a cabinet to fit around a pillar for example, to save you or your fitter trying to cut the cabinet on site. If we do it, we just need you to tell us the dimensions of the cut out. This will look much better when you look inside the cabinet as the cupboard sides will follow the sides of the pillar rather than seeing the actual pillar.

V Grooved Sides

We can supply our cabinet sides either plain or v grooved (this simulates a T&G effect but makes a much stronger cabinet than a cabinet made with T&G.)

Extended Sides

We can build a cabinet with an extended side or we can extend both sides. This means that you can cut or scribe the back of the sides to fit an un-even wall.

Inset Sides

If you are planning an island or peninsula involving back to back cabinets, you will have a join down the side where the cabinets meet. To overcome this we inset the side of each cabinet just behind the cabinet front frame, and we supply a panel that covers the whole length of the cabinets but fits flush behind the front frame. This way you hide the join without adding any extra width to the cabinets.

Part Cabinets

We can supply a door or two doors in a front frame for either a wall or base. This can go across a pillar to join 2 other cabinets, or between a wall and a cupboard in front of a boiler for example. We can also supply a front frame and 1 cabinet side to go around a pillar or a boiler. Sometimes we need to supply a front frame and 2 sides for a boiler (we leave off the top and base to allow air circulation).

Recess

As standard our base cabinets have a 50mm recess at the back, and our wall cupboards have a 20mm recess at the back. However, you can specify any recess you need for any cabinet. The only limit is where there is a reason for limiting the recess (drawer depth, size of an appliance, etc).

- Example is 600mm wide and in framed plinth style.
- Hand painted in Bone by Farrow & Ball.

02

CORNERS

HANDMADE KITCHENS OF CHRISTCHURCH

CORNER 001

Corner, 2 Doors

Supplied with 1 adjustable shelf.

Width is measured along each back wall. Depth is measured front to back.

If you increase depth you decrease the door size on the opposite side.
Min size for each door and its frame is 250mm.

One side can be longer than the other, but be aware that the doors will then be different sizes.

This unit is made in 2 pieces so it can be taken apart to get through doorways etc.

	Minimum	Standard	Maximum
Height	870mm	870mm	900mm
Width	850mm	900mm	1000mm
Depth	600mm	600mm	600mm*

**One or both sides can be extended up to 750mm*

- Example is 900mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 002

Corner, 2 Doors, Carousel

Width is measured along each back wall. Depth is measured front to back.

If you increase depth you decrease the door size on the opposite side.
Min size for each door and its frame is 300mm.

Best use of space with carousel is 900mm x 900mm

One side can be longer than the other, but be aware that the doors will then be different sizes.

This unit is made in 2 pieces so it can be taken apart to get through doorways etc. Actual carousel may vary depending on product improvements or availability

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	900mm	900mm	1000mm
Depth	600mm	600mm	600mm*

**One or both sides can be extended up to 750mm*

- Example is 900mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 003

Corner Blank, 1 Door

Supplied with 1 adjustable shelf.

Door can be on left of cabinet, right hinged, or right of cabinet, left hinged (as pic shows).

Min width of door and surrounding frame (the part of the cabinet that will be seen) is 450mm. Max width of door and surrounding frame (the part of the cabinet that will be seen) is 680mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	550mm	900mm	1280mm
Depth	100mm	600mm	600mm*

*One or both sides can be extended up to 750mm

- Example is 900mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 004

Corner Blank, 2 Doors

Supplied with 1 adjustable shelf.

Doors can be on left or right of cabinet.

Min width of door and surrounding frame (the part of the cabinet that will be seen) is 600mm. Max width of door and surrounding frame (the part of the cabinet that will be seen) 800mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	700mm	1200mm	1400mm
Depth	100mm	600mm	600mm*

*One or both sides can be extended up to 750mm

- Example is 1350mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 005

Corner Blank, 1 Door, Carousel

Door can be on left of cabinet, right hinged, or right of cabinet, left hinged (as pic shows).

Min width of door and surrounding frame (the part of the cabinet that will be seen) is 600mm. Max width of door and surrounding frame (the part of the cabinet that will be seen) is 680mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

Actual carousel may vary depending on product improvements or availability.

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	1150mm	1150mm	1280mm
Depth	600mm	600mm	600mm*

*One or both sides can be extended up to 750mm

- Example is 1200mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 006

Corner Blank, 1 Door, Lemans Corner

Door can be on left of cabinet, right hinged, or right of cabinet, left hinged (as pic shows).

Min width of door and surrounding frame is 550mm.

Max width of door and frame is 680mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

Actual pull out may vary depending on product improvements or availability.

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	1100mm	1150mm	1280mm
Depth	600mm	600mm	600mm*

*One or both sides can be extended up to 750mm

- Example is 1200mm wide in doorstyle C with a framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 007

1 Drawer, 1 Door, Corner Blank

Optional oak cutlery tray can be supplied for drawer subject to cabinet depth.

Drawer runner is a top quality soft close runner with a huge weight capacity of 40kg. The runner is hidden under the drawer, and has a quick release catch to enable the drawer to be removed easily for cleaning.

Drawer is dovetailed back and front.

Supplied with 1 adjustable shelf.

Door and drawer can be on left or right of cabinet.

Min width of door and surrounding frame (the part of the cabinet that will be seen) is 450mm. Max width of door and surrounding frame (the part of the cabinet that will be seen) 680mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

NOTE: Having a drawer on this unit will restrict ease of access into the cabinet. See **CORNER003** and **CORNER004** for a cabinet without drawer.

	Minimum	Standard	Maximum
Height	870mm	870mm	870mm
Width	550mm	900mm	1280mm
Depth	350mm	600mm	600mm*

**One or both sides can be extended up to 750mm*

- Example is 1150mm wide in doorstyle C, drawer style C with framed plinth.
- Chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

CORNER 008

1 Drawer, 2 Doors, Corner Blank

Optional oak cutlery tray can be supplied for drawer subject to cabinet depth.

Drawer runner is a top quality soft close runner with a huge weight capacity of 40kg. The runner is hidden under the drawer, and has a quick release catch to enable the drawer to be removed easily for cleaning.

Drawer is dovetailed back and front.

Supplied with 1 adjustable shelf.

Door and drawer can be on left or right of cabinet.

Min width of door and surrounding frame (the part of the cabinet that will be seen) is 600mm. Max width of door and surrounding frame (the part of the cabinet that will be seen) 800mm.

Leave 50mm gap between side wall and side of cabinet when calculating the width of the cabinet to allow for uneven walls.

NOTE: Having a drawer on this unit will restrict ease of access into the cabinet. See **CORNER003** and **CORNER004** for a cabinet without drawer.

	Minimum	Standard	Maximum

- Example is 800mm high and 600mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.

WALL 005

For Boiler

Supplied without base, top and back to facilitate air circulation.

NOTE: You must check your boilers installation manual to make sure this is suitable.

	Minimum	Standard	Maximum
Height	500mm	N.A	1000mm
Width	400mm	N.A	680mm
Depth	350mm	N.A	600mm

- Example is 800mm high and 600mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.
- Door is a working door.

WALL 006

Microwave Housing, 1 Door Over, Top Hinged

Only for a microwave made for a wall unit. Not a full depth microwave!
The aperture for the appliance is 385mm high and 600mm wide.

	Minimum	Standard	Maximum
Height	720mm	720mm	1000mm
Width	680mm	N.A	680mm
Depth	350mm	350mm	350mm*

*One or both sides can be extended up to 450mm

- Example is 800mm high and 680mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.

WALL 007

Fridge Top Box - One Panel

This is designed to go over the top of a freestanding fridge freezer (a USA style fridge freezer for example).

For widths up to 800mm. For widths from 801mm use **WALL 007A**.

Usually used with tall end panels or a tall larder each side.
See **WALL 010** Wine Rack as an alternative fridge top box.

This item is 500mm deep but lines up with adjoining cabinets at the front, usually leaving a 100mm gap at the back for air circulation.

	Minimum	Standard	Maximum
Height	300mm	N.A	500mm
Width	600mm	N.A	800mm
Depth	100mm	500mm	500mm

- Example is 400mm high and 800mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.

WALL 007A

Fridge Top Box - Two Panel

This is designed to go over the top of a freestanding fridge freezer (a USA style fridge freezer for example).

Use this item for widths of 801mm plus. For widths less than 801mm use **WALL 007**.

Usually used with tall end panels or a tall larder each side. See **WALL 010** Wine Rack as an alternative fridge top box.

This item is 500mm deep but lines up with adjoining cabinets at the front, usually leaving a 100mm gap at the back for air circulation.

	Minimum	Standard	Maximum
Height	300mm	N.A	500mm
Width	801mm	N.A	1300mm
Depth	100mm	500mm	500mm

- Example is 400mm high and 900mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.

WALL 007B

Bridge Unit

This is designed to go over the top of a freestanding fridge freezer (an American style fridge freezer for example).

Usually used with tall end panels or a tall larder each side.

See **WALL 010** Wine Rack as an alternative fridge top box.

This item is 500mm deep but lines up with adjoining cabinets at the front, usually leaving a 100mm gap at the back for air circulation.

	Minimum	Standard	Maximum
Height	150mm	N.A	320mm
Width	600mm	N.A	1200mm
Depth	100mm	500mm	600mm

- Example is 200mm high and 900mm wide in doorstyle C.
- Hand painted in Bone by Farrow & Ball.

WALL 008

2 Doors

Adjustable shelving x 2.

Extra shelves can be ordered.

If you need a height of more than 1000mm use a larger top.

	Minimum	Standard	Maximum
Height	500mm	720mm	1000mm
Width	600mm	N.A	1200mm
Depth	100mm	350mm	350mm*

*One or both sides can be extended up to 450mm

- Example is 800mm high and 800mm wide in doorstyle C with chrome knob.
- Hand painted in Bone by Farrow & Ball.

WALL 010

Wine Rack Top Box

1 Tier = 200mm high

2 Tier = 300mm high.

	Minimum	Standard	Maximum
Height	200mm	N.A	300mm
Width	600mm	N.A	1200mm
Depth	350mm	500mm	500mm

- Example is hand painted in Bone by Farrow & Ball.

12

PLATE RACKS & OPEN SHELVING

WALL 011

Plate Rack With Shelf Over

Plate rack section is 300mm high.

This item is only available in the following widths:
8 plates: 600mm wide - 12 plates: 800mm wide.

Oak T&G back option

	Minimum	Standard	Maximum
Height	600mm	720mm	720mm
Width	600mm	600mm	800mm
Depth	300mm	350mm	350mm*

*One or both sides can be extended up to 450mm

- Example is 720mm high and 600mm wide with optional T&G back.
- Hand painted in Bone by Farrow & Ball.
- Shown with optional T&G back.

WALL 013

Plate Rack With Shelf Over, & Spice Drawers

Plate rack section is 300mm high.

This item is only available in the following widths:
8 plates: 600mm wide - 12 plates: 800mm wide.

600mm wide = 2 spice drawers - 800mm wide = 3 drawers.

Spice drawers are not on runners but are dovetailed.

Oak T&G back option.

	Minimum	Standard	Maximum
Height	900mm	N.A	1000mm
Width	600mm	600mm	800mm
Depth	350mm	350mm	350mm*

*One or both sides can be extended up to 450mm

- Example is 720mm high and 600mm wide with optional T&G back.
- Hand painted in Bone by Farrow & Ball.
- Shown with optional T&G back.

WALL 014

2 Tier Plate Rack With Shelf Over

Bottom plate rack section is 300mm high.

Top plate rack section is 250mm high, 250mm deep.

This item is only available in the following widths:
8 plates: 600mm wide - 12 plates: 800mm wide.

Oak T&G back option.

	Minimum	Standard	Maximum
Height	870mm	N.A	1000mm
Width	600mm	600mm	800mm
Depth	300mm	350mm	350mm

**One or both sides can be extended up to 450mm*

- Example is 900mm high and 800mm wide with optional T&G back.
- Hand painted in Bone by Farrow & Ball.
- Shown with optional T&G back.

WALL 015

Open Adjustable Shelving

Adjustable shelving x 2.

Extra shelves can be ordered.

This item can be wall mounted or sit on the worktop.

Oak T&G back option.

	Minimum	Standard	Maximum
Height	500mm	N.A	1500mm
Width	300mm	600mm	1000mm
Depth	100mm	350mm	350mm

**One or both sides can be extended up to 450mm*

- Example is 800mm high and 400mm wide with optional T&G back.
- Hand painted in Bone by Farrow & Ball.

WALL 016

Open, Fixed Shelf

Oak T&G back option.

	Minimum	Standard	Maximum
Height	700mm	900mm	1000mm
Width	300mm	N.A	1000mm

MANTELS

HANDMADE KITCHENS OF CHRISTCHURCH

EXTRACT 001

Extractor Canopy With Panels

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob.

Also make sure that you check your hob manual (or web- site) to get the minimum height from hob to extractor. As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you MUST install according to your hob manufacturers instructions!

Cabinet has no back.

Make sure your cupboard has enough height for extractor and ducting as in the pic above.

Up to 800mm = 1 panel 801mm - 1400mm = 2 panels

	Minimum	Standard	Maximum
Height	350mm	N.A	1050mm
Width	600mm	N.A	1400mm
Depth	350mm	350mm	450mm

- Example is 600mm high and 900mm wide.

- Hand painted in Bone by Farrow & Ball.

EXTRACT 002

Extractor Canopy Cupboard

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob. Base is recessed 20mm.

Also make sure that you check your hob manual (or website) to get the minimum height from hob to extractor.

As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you MUST install according to your hob manufacturers instructions!

	Minimum	Standard	Maximum
Height	350mm	N.A	650mm
Width	600mm	N.A	1000mm
Depth	350mm	350mm	450mm

- Example is 520mm high and 700mm wide with door style C with chrome hinges and knob.

- Hand painted in Bone by Farrow & Ball.

EXTRACT 003

Extractor Canopy Door

This is suitable for an integrated canopy extractor where you pull the door open to start the extractor.

Make sure that this cupboard is 100mm wider (50mm each side) than hob.

Also make sure that you check your hob manual (or website) to get the minimum height from hob to extractor.

As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you **MUST** install according to your hob manufacturers instructions!

	Minimum	Standard	Maximum
Height	350mm	N.A	650mm
Width	600mm	N.A	700mm
Depth	20mm	20mm	20mm

- Example shown is in door style C with chrome hinges and knob.
- Hand painted in Bone by Farrow & Ball.

EXTRACT 005

Extractor Housing

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob. Base is recessed 20mm.

Also make sure that you check your hob manual (or website) to get the minimum height from hob to extractor.

As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you **MUST** install according to your hob manufacturers instructions!

	Minimum	Standard	Maximum
Height	200mm + cornice	N.A	200mm + cornice
Width	700mm	N.A	1800mm
Depth	350mm	450mm	450mm

- Example is 200mm high plus cornice and 1000mm wide.
- Hand painted in Bone by Farrow & Ball.

EXTRACT 005E

Extractor Housing

This item is the same as **EXTRACT 005** but with engraving - between 6 – 15 letters depending on width of cabinet.

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob. Base is recessed 20mm.

Also make sure that you check your hob manual (or website) to get the minimum height from hob to extractor.

As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you **MUST** install according to your hob manufacturer's instructions!

	Minimum	Standard	Maximum
Height	200mm + cornice	N.A	200mm + cornice
Width	700mm	N.A	1800mm
Depth	350mm	450mm	450mm

- Example is 200mm high plus cornice and 1000mm wide.
 - Hand painted in Bone by Farrow & Ball.

EXTRACT 006

Extractor Canopy With Panels

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob.

Also make sure that you check your hob manual (or web- site) to get the minimum height from hob to extractor. As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you **MUST** install according to your hob manufacturers instructions!

Make sure your cupboard has enough height for extractor and ducting as in the pic above. Cornice will be supplied loose and will match the cornice ordered for the rest of the kitchen, unless otherwise requested.

Up to 800mm = 1 panel.
 801-1200mm = 2 panels.
 1201-1400mm = 3 panels.

	Minimum	Standard	Maximum
Height	350mm	N.A	1050mm
Width	600mm	N.A	1400mm
Depth	350mm	350mm	450mm

- Example is 600mm high and 900mm wide.
 - Hand painted in Bone by Farrow & Ball.

EXTRACT 006A

Extractor Canopy With No Panels

This is suitable for a canopy extractor that fits into the underneath of the cabinet like the SMEG model below.

Make sure that this cupboard is 100mm wider (50mm each side) than hob.

Also make sure that you check your hob manual (or web- site) to get the minimum height from hob to extractor. As a guide it is likely to be about 650mm for an electric hob or 760mm for a gas hob, but you MUST install according to your hob manufacturers instructions!

Make sure your cupboard has enough height for extractor and ducting as in the pic above.

Cornice will be supplied loose and will match the cornice ordered for the rest of the kitchen, unless otherwise requested

	Minimum	Standard	Maximum
Height	350mm	N.A	1050mm
Width	600mm	N.A	1400mm
Depth	350mm	350mm	450mm

- Example is 600mm high and 900mm wide.
- Hand painted in Bone by Farrow & Ball.

MANTEL 004

Mantel

This is a full Mantel.

Each side is 320mm - 400mm wide.
